Kyle Stanfield
Director, Environment and Sustainability
Rainy River Resources Ltd.
1111 Victoria Avenue East
Thunder Bay, ON P7C 1B7

Dear Kyle,

On behalf of Mining Matters, I wish to thank you for your partnership in launching the first Mining Matters Earth Science Camp in Fort Frances. It was such a pleasure to work with you and we greatly enjoyed engaging community members in Earth science, mineral exploration and mining with our unique learning activities. Please find enclosed the final report for our partnership program.

Building new and strengthening existing partnerships with communities, government, industry, and education is critical to designing and delivering our camp. Your commitment to Mining Matters and to all aspects of the program has laid the foundation for a sustainable camp year after year. We hope that this is the beginning of a lasting partnership and look forward to future collaborations.

Mining Matters' ability to broaden awareness of Earth science, mineral exploration and mining, and its importance to our lives relies on those who share and support our vision. Again, your valued partnership is deeply appreciated and represents an important investment in mineral resources education.

Most sincerely,

Barbara Green Parker
Aboriginal Education Specialist
